

DAVID LAWAL

Frontend Engineer & AI Developer — Nuxt · React / Next.js · Interactive 3D Web · Open to Remote

dlawal979@gmail.com · Lagos, Nigeria · mxxscott.github.io · github.com/MxxScott

PROFESSIONAL SUMMARY

Frontend engineer who ships complete production systems — from WebGL interfaces built with React Three Fiber to AI pipelines that fuse multiple OCR engines via Levenshtein consensus and FLAN-T5. Proficient in Nuxt / Vue 3 and React / Next.js 15; backed by a systems foundation in Python, C, C++, and RISC-V / MIPS assembly. Available for remote and hybrid opportunities.

TECHNICAL SKILLS

Frameworks: Nuxt, Vue 3, React 19, Next.js 15, Tailwind CSS, Framer Motion, Three.js / React Three Fiber

Languages: JavaScript (ES2024), TypeScript, HTML5, CSS3, Python, C, C++, Java, RISC-V / MIPS Assembly

AI / ML: HuggingFace Transformers, EasyOCR, Calamari OCR, pytesseract, FLAN-T5, PyTorch

Tooling: Node.js, Express, Git / GitHub, GitHub Actions (CI/CD), Netlify, npm

SELECTED PROJECTS

FusionOCR — Multi-Engine OCR Pipeline github.com/MxxScott/FusionOCR

- Runs Tesseract, EasyOCR, and Calamari simultaneously; fuses outputs via word-level Levenshtein distance consensus voting, then refines with FLAN-T5. Structured logging with per-run timestamped debug files.

Stack: Python, EasyOCR, Calamari, HuggingFace Transformers, FLAN-T5, PyTorch

Portfolio — mxxscott.github.io github.com/MxxScott/MxxScott.github.io

- Sole engineer: scroll-linked WebGL hero (React Three Fiber), Framer Motion animation system, custom cursor, and a Python / GitHub Actions CI/CD pipeline that fetches live project data from the GitHub API daily.

Stack: Next.js 15, React Three Fiber, Framer Motion, Tailwind CSS 4, Python, GitHub Actions

Roar — Article Builder Platform github.com/MxxScott/roar-frontend

- Complete frontend of a content-creation platform: mobile-first article builder, component-driven UI system, full TypeScript type coverage.

Stack: Next.js 15, React 19, Tailwind CSS 4, Framer Motion, TypeScript

Onlearn — E-Learning Platform github.com/MxxScott/Onlearn

- Fully responsive landing experience with component architecture, accessibility best practices, and production-grade documentation.

Stack: Nuxt, Vue 3, Tailwind CSS, TypeScript

Terminal Games (C++) github.com/MxxScott/terminal-games-cpp

- Snake and Pac-Man from scratch in C++: game loops, grid collision, and ghost hybrid AI (Manhattan-distance chase + random movement). Zero external libraries.

Stack: C++, Terminal, Game Loop, AI

Wings Height Insurance Brokers github.com/MxxScott/Wings-Height-Insurance-Brokers-Limited

- Complete multi-page corporate website — quotes, claims, bookings, service pages — framework-free.

Stack: HTML5, CSS3, JavaScript

EXPERIENCE

ICT Intern — AlmondSprings School

Igando, Lagos (NG) · Sep 2020 – Dec 2020

- Instructed Information and Communication Technology at elementary and secondary levels through lectures, demonstrations, and one-to-one tutoring.
- Maintained classroom and laboratory computers; supported staff and students with hardware and software issues.
- Administered standardized assessments and interpreted results to identify individual student strengths and needs.

EDUCATION

B.Sc. Computer Science — Caleb University, Lagos (NG) In progress (transferred 2025)
